## Protect in Pregnancy with Oral B

Whilst many women are highly conscious of their fitness and diet when pregnant, research has shown that nearly half (49%) of mums-to-be are not realising the significance of their dental health during pregnancy.

In fact, 61% of women think that brushing their teeth is one of the least important factors when it comes to health and wellbeing during pregnancy!

Gabby Logan is presenting Oral B's "Protect in Pregnancy" – a webcast looking at

dental protection during pregnancy featuring top UK Dentist, **Dr Surinder Hundle**, former Nutrition Editor of Good Housekeeping Magazine, and author of the GI Plus Diet, **Fiona Hunter**, and **Jo Sweeney** from the National Childbirth Trust.

[Check out the webcast online from Saturday June 16th.](#)
